Number of people killed by explosive weapons worldwide between April and September 2006 (Editorial, p 761)

70% Proportion of cases of HIV in volunteers given a new vaccine compared with the placebo group (News, p 772)

£12.7bn Estimated total cost of the NHS National Programme for Information Technology (Feature, p 778)

1.0 ng/ml Prostate specific antigen concentration below which prostate cancer can be virtually ruled out (Research, p 793)

26×11 mm Size of the camera “pill” swallowed by patients undergoing capsule endoscopy (Clinical review, p 796)

PICTURE OF THE WEEK
A glass sculpture of the swine flu A/H1N1 2009 virus by artist Luke Jerram, on display at the Wellcome Collection until 18 October 2009. Jerram has worked with leading virologist Dr Andrew Davidson from the University of Bristol to produce translucent glass models of the infectious agents responsible for some of the most deadly diseases, including smallpox, HIV, E coli, A/H1N1, and SARS. See research, p 792.
